

NSN: 4920-01-501-8095 P/N: TVCS-6000-1

TestVonics Maintenance and Calibration Test Stand (MCTS) was designed specifically to assist maintainers when calibrating, troubleshooting, or repairing the TTU-205 and Flight Line Maintenance test sets. The MCTS features rotating mounting arms which are designed to securely lock the TTU-205 front panel. These arms allow the test set to be rotated a full 360° and lock in place every 45°.

- Allows full 360° rotation with the option of locking the unit every 45°
- Mounted on four locking swivel casters for high mobility.
- Allows full access to all sub-assemblies including A1 - A5 PWB's
- Lightweight aluminum frame with certified welded construction for durability & safety
